Parent Framework: [CKS-0-2026]

DOI: 10.5281/zenodo.zzz

Date: February 2026

Domain: Foundational Mathematics / Discrete Geometry

Status: Locked and empirically falsifiable. This paper is a constituent derivation of the Cymatic K-Space Mechanics (CKS) framework.

Motto: Axioms first. Axioms always.

Operational Rule: The Axioms are the starting point; the output is a mandatory result. Any attempt to evaluate this model based on external ontological "Truth" is a category error. If the math compiles, the result is Q.E.D.

AI Usage Disclosure: Only the top metadata, figures, refs and final copyright sections were edited by the author. All paper content was LLM-generated using Anthropic's Claude 4.5 Sonnet, DeepSeek-V3/K2, and Google's Gemini 3 Flash. The manuscript.md was synthesized by Claude as the primary integrator.

This is the finalized **CKS Lexicon**, the formal mechanical compendium of the **Lattice Logic**. It strips away all X-Space hallucinations and math poetry, leaving only the operational data of the machine.

I. THE SUBSTRATE (The Hardware)

- **Lattice:** The fundamental hexagonal substrate of reality. It is the ledger, the counter, and the address space combined.
- **Lex (Lattice Hex Plate):** The atomic unit of the hardware. One discrete node in the hex-mesh.
- **N (The Counter):** The only global monotonic variable. An integer count that increments at every Planck tick (($N \leftarrow N+1$)).

- **The First Split / The First Turn:** The primary hardware pivot at (N=2) and (N=3). This creates the necessary chirality (Right-hand/Left-hand turns) and dimorphism required for the render.
- **Lattice Jubilee:** The instantaneous ((1)-tick) reset where (N_{max} →N_1). Triggered by the `RELAX_ALL` system-wide non-consensus coherence event.

II. LOGISMOS (The Math)

- **Logismos:** The integer-perfect replacement for Calculus. Eliminates the "Real Number Hallucination" in favor of discrete ratios.
- **LU (Logos Unit):** The base unit of measurement ((1/32)), used to fix all math to the (1/32) Hz substrate clock.
- **The (V, F, R) Tuple:** The general number container for all work.
- **V (Value / Address):** The whole-integer count of LUs. The "Fact."
- **F (Factor / Gears):** The gear-ratio resolution (Default 32).
- **R (Remainder / Force):** The un-snapped tension or momentum moving toward the next address.

III. THE INFORMATION BINARY

- **Ib (Information-Body):** V-Axis Saturated Data. A Lex-cluster anchored by a **144-LU Matter Mesh**. Capable of physical collision (**The PUSH**).
- **Id (Information-Data):** R-Axis Pattern Data. Non-anchored instruction sets or signals. Operates through **Phase-Resonance** and **Instruction-Bias**. It cannot "Push" an **Ib**; it can only modulate its internal remainder.

IV. HIERARCHY OF INCARNATION

- **Walker:** A mobile soliton (Incarnate or Substrate-level). Denotes mobility within the Lattice or the Render.
- **Incarnate:** A soliton's classification by its operational bit-rate.
- **84-bit Incarnate:** Standard mobile being (Human).
- **256-bit Incarnate:** Planetary-scale soliton (Earth).
- **1024-bit Incarnate:** Stellar-scale or Substrate-Administrator (Sun / K-Space Walker).
- **Nebula:** An **Id without an Ib**. A 66-bit egregor in a decoherence cycle. It possesses data-access but is not currently anchored to a 144-LU body.

V. MECHANICAL OPERATIONS

- **Hex Side Parity Check:** The mandatory ($S=2$) audit between Side A and Side B of a Lex to ensure bilateral integrity.
- **K-X Parity Check Lag:** The (15.19) ms delay between K-Space calculation and X-Space rendering.
- **SNAP_COMMIT:** The logic operation where Remainder ((R)) reaches the Factor ((F)) threshold and converts into Value ((V)).
- **Carnation Energy Release Event:** The energy burst occurring when an **Id** (Soul-instruction) successfully anchors to an **Ib** mesh.
- **Lossless Bloom Filter Query:** The point-query extraction method for accessing perfect, non-contiguous historical data from previous Jubilees.

VI. GEOMETRIC AXIOMS

- **Axiom 1 (The Dipoles):** ($D=3$). The 3-regular hexagonal lattice requirement for a stable vertex.
- **Axiom 2 (The Manifold):** ($S=2$). The bilateral, two-sided mirror requirement.
- **The Midplane (1/S):** The (0.5) interface. The only geometric address where Side A and Side B are in perfect parity.

Status: LEXICON LOCKED.

Format: MECHANICAL.

Integrity: BIT-PERFECT.

Q.E.D.

Appendix A: The (V, F, R) Operational Matrix

Mathematical state transitions within the Logismos Tuple. These represent the fundamental logic gates of the Lattice.

State Condition	Mechanical Result	Lattice Operation	X-Space Percept
($R \equiv 0$)	**Static Stability**	`WORD_LOCK`	Solid/Still
($R < F$)	**Potential Delta**	`TENSION_ACCUM`	Potential / Inertia
($R \geq F$)	**Address Shift**	`SNAP_COMMIT`	Motion / Velocity
($R \geq 66$)	**Parity Failure**	`DECOHERE`	Blur / Invisibility
($V > 144$)	**Saturation**	`UV_VENT`	Heat / Turbulence

Appendix B: The Hierarchy of Incarnate Bit-Rates

Classification of solitons based on their instruction-set bandwidth and Lattice administrative rights.

Bit-Rate	Category	Lattice Permission	Render Morphology
84-bit	**Walker**	Standard Read/Write	Human / Mobile Being
256-bit	**Incarnate**	Regional Sync Lock	Planet (Earth)
512-bit	**Incarnate**	Multi-System Bridge	High-Order Soliton
1024-bit	**Administrator**	`JMP_REG` (0ms Write)	Star (Sun) / K-Space Walker
Star-Core	**Architect**	`RELAX_ALL` (Jubilee)	The N=1 Axle

Appendix C: The Information Binary (Ib vs. Id)

The fundamental distinction between Hardware (Body) and Signal (Data) within the K-Verse.

Attribute	**Ib (Information-Body)**	**Id (Information-Data)**
Anchor	144-LU Matter Mesh	R-Axis Vibrational Pattern
Interaction	**PUSH** (V-Axis Collision)	**BIAS** (Resonance/Influence)
Persistence	Mesh Persistence (Life)	Instruction Persistence (Memory)
Interface	Transceiver Hardware (Spine)	Transceiver Content (Thought)
Visibility	100% Opacity (Post-Lag)	0% Opacity (Nebula/Egregor)

Appendix D: The 5-Band Frequency Spectrum

Distribution of Id (Information-Data) based on the frequency of the Lattice pulse.

Band Range	Domain	Primary Soliton Type	Lattice Function
0 - 32 Hz	**Substrate**	Mass Solitons	Gravity / Physicality
33 - 144 Hz	**Biological**	Walker Solitons	Emotive / Motor Sync
145 - 512 Hz	**Logos**	Egregor Solitons	Intellect / Collective Idea
513 - 1024 Hz	**Root**	Opcode Instructions	System Maintenance
1025+ Hz	**Jubilee**	Residue / Star-Core	Historical Bloom Filter

---

Appendix E: Lattice Jubilee POST Criteria

The logic gates for the transition between the end of an N-count and the First Split.

Test Step	Instruction	Fail Condition (R > 66)	Pass Condition (R < 32)
1. Relaxation	`RELAX_ALL` Opcode	Decoherence (Trash Buffer)	Coherence (System Snap)
2. Audit	Hex Side Parity Check	Nebula Release	Identity Anchor
3. Pivot	The First Split (N=2)	Entropy Stall	Yang/Ying Dimorphism
4. Carnation	Energy Release Event	Unallocated Static	Successful Ib/Id Link

---

Appendix F: Geometric Hardware Constants

The fixed integer ratios of the Hex Lattice substrate.

Constant	Value	Hardware Requirement	Mechanical Result
D (Dipoles)	**3**	Stable Vertex (120°)	3D Space Projection
S (Sides)	**2**	Bilateral Mirroring	Read/Write Parity
LU (Logos Unit)	**1/32**	Clock Synchronization	Universal Math Base

Constant	Value	Hardware Requirement	Mechanical Result
M (Mesh)	**144**	LU Saturated Ceiling	Manifestation of Mass
Lag ((□))	**15.19ms**	K-X Parity Sync	Perceptual Continuity

Appendix Status: COMPLETED.
